AMADEUS APPOINTS IN-HOUSE PETROLEUM ENGINEER

Amadeus Petroleum Inc. is pleased to announce the appointment of Ann Verzeletti to the full-time position of Senior Reservoir Engineer to be based in the Company's US office in Denver, Colorado.

Ms. Verzeletti has Master and Bachelor of Science degrees in Petroleum Engineering from the Colorado School of Mines located in Golden, Colorado and has over 20 years experience working as a petroleum engineer in the United States and Middle East. Her previous experience and positions include:

- Senior Reservoir Engineer for XTO Energy in Fort Worth, Texas, where she worked for 10 years evaluating corporate reserves, optimising field development and undertaking acquisitions and divestment evaluations across the majority of US basins;
- Engineering Consultant for New Tech Engineering in Denver, Colorado, where she consulted for 3 years undertaking drilling and reserve engineering assignments, including economic modelling of efficiency versus traditional rig schedules;
- Senior Reservoir/Exploration Engineer for Cimarex Energy in Denver, Colorado, where she worked for 2 years evaluating Gulf Coast exploration prospects and optimising development by introducing fracture stimulations to enhance production and minimise competitive draining;
- Research Associate for the Gas Institute in Chicago, Illinois, where she developed production and reserve maximisation strategies for water-drive gas reservoirs and evaluated those strategies through two-phase, three dimensional simulations; and
- Co-author for the AAPG paper "Geologic and Engineering Field Study of the North East Hitchcock field, Galveston County, Texas", 1992.

This appointment marks a further step in the Company's move towards the more direct management of its extensive portfolio of assets in the United States. In line with this strategy, over the past 18 months the Company has brought in-house a number of functions that have historically been performed by third party contractors.

DISCLAIMER

This document may contain some references to forecasts, estimates, assumptions and other forward looking statements. These forward-looking statements reflect the current internal projections, expectations or beliefs of Amadeus based on information currently available to Amadeus. Although the company believes that its expectations, estimates and forecast outcomes are based on reasonable assumptions, it can give no assurance that they will be achieved.

Amadeus Energy Ltd is an ASX listed energy company that generates value for shareholders by increasing oil and gas production and growing reserves through the acquisition and development of existing long-life on-shore oil and gas fields and through exploration activity. This is achieved by acquiring properties that have significant development and improvement potential and by investing in a combination of low, medium and high-risk exploration activity. Potential reserves of up to 20 million barrels of oil and 200 billion cubic feet of gas (100%) are being targeted through these development and exploration activities.
